

November 2010

We have updated our medicine policy and method of recording medicine as highlighted in our recent Care Commission inspection.

All medicine sheets now state that parents are giving permission for medicine to be administered. It also states that the first dose of each medication has been given as due to possible allergies we are not allowed to give the first dose from medicine bottles.

Could parents also note that all medicines received by the nursery must be accompanied by the medicine leaflet or we are unable to administer the medication.

A copy of the medicine policy will be sent with the December newsletter for consultation with all parents.
