

Parents Notice

Karen would like to advise parents that this week both the skin rashes Chicken pox and Impetigo have been highlighted to her. Despite their only being two cases of Chicken pox and one case of Impetigo we would ask all parents to be extra vigilant over the next few weeks.

However, should you require any further information regarding these skin rashes please refer to the Health Protection Agencies guidance on Infection Control in Schools and other Child Care settings, which can be found at www.hpa.org.uk.

Once on the Health Protection Agencies home page you will find guidance on these skin rashes under the Publications tab.

Should you require any further information please feel free to speak with a member of staff who will be happy to assist.

Thank You
