

We appreciate the difficulties parents have in finding childcare for their children and the nursery is here to help in any way we can however can we please, please ask that children are not brought to nursery when unwell. It can be quite distressing to the child and is currently having a major impact on the health of other children within the nursery. We understand that this request may cause difficulties however the nursery must be aware of the health and wellbeing of all children in its care. If parents require any information regarding guidelines for illness in nursery this can be found on the following website by the Health Protection Agency:

http://www.hpa.org.uk/webc/HPAwebFile/HPAweb_C/1194947358374

We will also be introducing a hand sanitiser which will be located at the front door. We strongly request that all children, parents, staff and visitors use this upon entering the nursery to minimise the spread of infection. Your cooperation and participation in making this part of the daily routine would be appreciated.
