

DESIGN GUIDANCE FOR EARLY LEARNING AND CHILDCARE SERVICES

As part of the expansion of early learning and childcare to 1,140 hours by 2020, the Scottish Government, in collaboration with Scottish Futures Trust and the Care Inspectorate are developing design guidance for early learning and childcare service providers.

The guidance will relate to the accommodation and the environment they provide. It will be useful for providers when they:

- consider providing an early learning and childcare service
- plan for any expansion
- develop their indoor and / or outdoor spaces

CLOSING DATE: 28 FEBRUARY

To help us in our research, we would like the views from managers and staff who work directly with children therefore a survey has been provided to the nursery.

However we would also like the views from parents and carers of children who use Little Treasures. We are asking for your views through a separate survey from staff. We would appreciate if parents and carers who use Little Treasures complete this separate survey.
