

At Little Treasures Nursery we are continuously working to ensure we are offering both the highest quality of service, as well as the highest quality of experiences for the children in our care, therefore taking into consideration the views of both the children and their parents we have decided it would be beneficial to create some plots within the growing area which the children will have the opportunity to help create, develop and use.

The plots will allow children the opportunity to further develop their learning and understanding of a wide range of areas, including seasons, growing, new life, being healthy, risk assessing, working together and so on.

We will be working alongside both our fantastic gardeners, as well as the local 'Watch Us Grow' group to develop and create this fantastic area, however if you can offer any help, support or your expertise with this development then please feel free to speak to a member of staff as always we are extremely grateful for continued support.
